

DVD AUTHORIZING MADE EASY

DVD SHOP AUTOMATIC DVD AUTHORIZING

Author a DVD from any DV/Analog source

Automatically Output to any Printer and most USB Duplicators

Quickly create professional DVD menus, backgrounds and thumbnails, all with a few clicks of a mouse!

Fully Automated DVD Creation and Production

Setup and launch a DVD authoring and production job in a matter of minutes! DVD Shop automates the DVD creation and production process. Automated features include real time video & audio capture, DVD format creation, DVD menu creation, DVD package printing and disc output (single or multiple copies).

Make a DVD From Any Source

Author a DVD from any DV/Analog source including Video Mixer, Camera, VHS Player, ScreenPlay/NLE or live capture feed.

Point & Click User Interface

We have designed our intuitive user interface with the look and feel of standard video deck controls making it easy to master the use of DVD Shop in a matter of minutes.

Custom Chapter Selections

Apply a variety of comprehensive chapter methods to your DVD including; Arbitrary number of chapters, Arbitrary chapter length, Smart Chapter selection, Scene change only, Custom Chapters and one chapter per segment.

Real-Time Video/Audio Capture

You can configure DVD Shop with a variety of real-time video encoders that support industry standard inputs including composite, S-Video and DV. The benefit is that you can automate your videotape to DVD conversions or you can use the system for live capture from a camera or video switch.

Dolby AC3 Audio Encoding

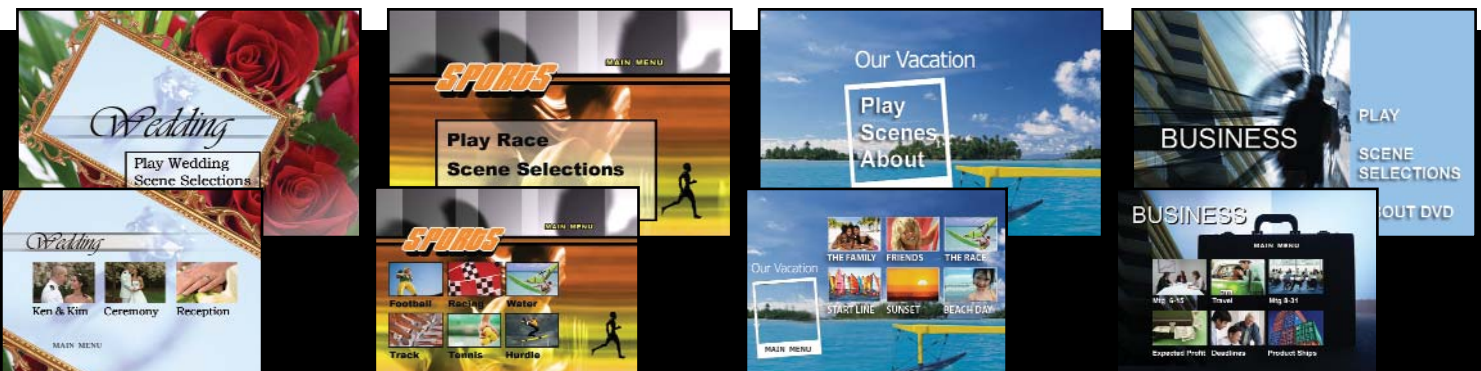

From the Encoding menu you can select either Stereo AC3 (Dolby) or MPEG Audio for the audio encoding format.

Segment Encoding

With this feature you have the ability to pause and restart the video capture as necessary. Each time you do the system will automatically place a chapter marker at the beginning of the next video segment and this marker will show up as a scene selection on your DVD menu.

Auto Play/Continuous Playback Option

You can choose to create a DVD that stops after one play through or you can choose a continuous or looped DVD format.

"YOUR ONE STOP DVD SHOP"
